

1988 Mercedes/Freightliner Unimog FLU419 SEE – Loader & Backhoe – Complete Package

\$17,500 OBO – Southern California

For sale is a **Mercedes-Benz/Freightliner Unimog FLU419 Small Emplacement Excavator (SEE)** military engineering vehicle. The truck is being sold **as one complete package with its front-end loader and rear backhoe/excavator assemblies.**

This vehicle belonged to a longtime vehicle collector who passed away several years ago. His family is now selling the property and has asked me to help sell the vehicle and equipment.

CONDITION

The Unimog is **currently NOT RUNNING** and has been sitting for several years.

Mice damaged some of the wiring underneath the dashboard, and we have not been able to get the truck started. The dashboard has been removed from its normal position to access the wiring, as shown in the photos.

We do not have the time to diagnose or repair the truck before selling it.

Because it cannot currently be started, **the engine, drivetrain, hydraulics and other mechanical systems should be considered untested and their present operating condition is unknown.** The vehicle is being sold **AS-IS**.

This is being represented as a project/restoration vehicle, not as a currently operational piece of equipment.

INCLUDED IN THE SALE

The sale includes the **truck and the loader/backhoe equipment shown in the photographs**, including:

- FLU419 SEE Unimog truck
- Front loader assembly
- Front loader bucket
- Loader hydraulic cylinders and associated hydraulic components
- Rear backhoe/excavator assembly
- Backhoe boom and dipper/stick
- Backhoe bucket
- Backhoe operator's seat
- Backhoe hydraulic control station
- Hydraulic cylinders, hoses and components shown in the photos
- Associated mounting hardware/components currently with the equipment

ALSO INCLUDES TRAILER AND ALL ITEMS THEREON

The loader and backhoe assemblies are presently **removed from the truck**, but both are included in the sale.

THE TRUCK AND ATTACHMENTS WILL NOT BE SEPARATED.

Everything shown is being sold together as one package.

VEHICLE / EQUIPMENT CONDITION

This is an older ex-military vehicle that has been stored outdoors and should be expected to need mechanical and electrical work before being placed back into service.

The photos are intended to show the current condition and completeness of the truck and equipment. Please examine them carefully.

We do not have detailed service records and cannot answer questions regarding the internal condition of the engine, transmission, hydraulic system or other mechanical components beyond what can be visually inspected.

The known issue preventing us from attempting normal operation is the **rodent-damaged wiring under the dashboard**. However, we are **not claiming that wiring repair is the only work necessary to make the vehicle operational**.

SALE & REMOVAL

Asking \$17,500 OBO for the complete package.

Reasonable offers will be considered.

The truck and attachments are located in **Oak Hills, CA 92344, San Bernardino County**, in the **Antelope Valley area of Southern California**.

Buyer is responsible for all loading, rigging and transportation.

Please understand that this is a large, heavy vehicle accompanied by substantial loader and backhoe assemblies. The buyer will need to make appropriate arrangements to remove everything from the property.

The seller does not have the ability to deliver the equipment.

Serious inquiries only.

When contacting me, please understand:

It does not currently run.

We do not know what additional repairs it may require.

The loader and backhoe are included.

The components will not be sold separately.

The entire package is sold as-is.

Buyer is responsible for removal and transportation.
